

Licensing Opportunity — CEHE Patent Portfolio

Causal Environmental Health Event (CEHE) Detection & Intelligence System

WHAT IT IS

CEHE is a patented multi-layer intelligence system that passively monitors ambient environmental conditions — air quality, particulates, temperature, humidity, pressure, VOCs — and correlates them with simultaneous physiological changes in occupants. The system autonomously detects, timestamps, and records causal health events without requiring user interaction or active breath sampling.

THE DISTINCTION

- **Active breath analysis (PNOE, Owlstone)** Requires user action, point-in-time only
- **Standard air quality monitors** Environmental data only — no physio layer
- **CEHE (AQD-0001 through AQD-0004)** Passive, continuous, causal — env + physio fused

PATENT PORTFOLIO

AQD-0001	USPTO #64038293	Causal Environmental Health Event Detection System	PENDING
AQD-0002	USPTO #64038343	Predictive ML Layer — LSTM/Transformer Models	PENDING
AQD-0003	USPTO #64038373	Distributed Geographic Sensor Network	PENDING
AQD-0004	USPTO #64038393	EHR/Clinical Structuring Integration	PENDING

Filed: April 13, 2026 | Micro-Entity Pro Se | USPTO Customer #230085

Non-Provisional Deadline: April 13, 2027

Licensing Opportunity — Continued

MARKET OPPORTUNITY

Total Addressable Market	\$45B+	Global indoor air quality & environmental health
Serviceable Market	\$8.2B	Smart building + occupational health monitoring
Wearable Health Tech	\$60B+	Adjacent physio-monitoring market by 2030

IDEAL LICENSING PARTNERS

- **Component Manufacturers**
Sensirion, Bosch Sensortec — integrate CEHE IP into sensor SDKs
- **Air Quality Platforms**
Airthings, Awair, uHoo — add causal health event layer to products
- **Smart Building / HVAC**
OEMs seeking differentiated indoor health analytics capability
- **Occupational Health / EHS**
Enterprise safety programs, industrial hygiene, insurance risk
- **Healthcare / EHR Systems**
Clinical structuring of environmental triggers (ICD-10/CPT billing)

LICENSING STRUCTURES AVAILABLE

Field-of-Use License

Rights to specific vertical or application domain

Exclusive License

Single licensee for defined territory or field

Cross-License / Co-Dev

Joint development with IP sharing agreement

Acquisition

Full portfolio acquisition considered for qualified parties

INVENTOR

Abdul Qawwee Daniels

Founder, AQD Technology | Pittsburgh, Pennsylvania

Pro se inventor and founder managing a multi-patent portfolio independently across two verticals: environmental health intelligence (CEHE pipeline) and intelligent safety hardware. 15 years of licensed construction electrical experience. Operating as micro-entity, USPTO Customer #230085.
